

Dear PSE&G customer:

At PSE&G, safety is our number one priority. We are inspecting natural gas meters in your neighborhood, ensuring the continued safety and reliability of your gas service. We conduct these safety inspections to check for surface corrosion, leaks and other conditions that might require repair.

The inspection is free and will take about 10 minutes. Unless your meter requires immediate repair, there will be no interruption to service. Additionally, service will not be turned off during this inspection due to billing status.

If you have an inside meter, someone over the age of 18 will need to give our technician access to the meter for a visual inspection. If you are not home when we come, we will leave a door hanger with a number for you to call and schedule an appointment.

Meters that are located outside will also be inspected. Although technicians will be on your property, customers do not need to be home for outside meter inspections.

We remind you to always ask for identification when a utility worker comes to the door. Employees carry a PSE&G photo identification badge, wear PSE&G logo apparel and drive PSE&G cars or trucks. If you're concerned in any way, please call PSE&G's customer service line at 800-436-PSEG (7734) to verify the identity of our employee.

We appreciate your help in ensuring that PSE&G can continue to provide you with safe and reliable natural gas service – now and in the future.

Thank you,

Jeff Dahl  
*PSE&G Senior Gas Distribution Supervisor*
