Basis for Intervening:

This is a formal request for intervenor status on behalf of the Bucks County Concerned Citizens Against the Pipelines. The PennEast pipeline project would undoubtedly cause irreparable environmental harms to the landscape of Bucks County and beyond. The continued negative cumulative impacts of gas fracking and pipeline infrastructure on the health and welfare of the citizens of Pennsylvania is deplorable. The PennEast Pipeline is unwelcome in our communities and we will continue to voice our opposition to this project. We appeal to FERC to consider the reasonable alternatives of renewable and sustainable energy resources in lieu of this unnecessary project. We need to address existing pipeline infrastructure -which is presently degrading and compromised- instead of burying more dangerous gas pipelines in the ground. We respectfully request that the Commission grant our Motion to Intervene as a party with full rights to participate in further proceedings.
