Basis for Intervening:

The Dallas Township Board of Supervisors wishes to file as an intervener relative to the PennEast pipeline project. We are acting at the request of our residents, who approached the board with a signed petition asking us to do so. The company has sent letters to our residents with little or no vague information. When the people attempt to contact the company with questions, as suggested in the letters, their calls are not being returned. Vague information supplied to people whose properties and lifestyles are being threatened, is both unprofessional and unfair. It is reprehensible that companies such as this can dangle "eminent domain" language over their heads with not even a modicum of respect.
