Re: PennEast Pipeline Route – Impact on Bethlehem Authority Water Supply Facilities

Dear Secretary Rose:

The Board of Supervisors of East Allen Township, requested a Letter be sent to your Attention regarding the proposed route for the PennEast Pipeline and its possible impact on the Water Supply Facilities of the Bethlehem Authority located in Carbon County.

East Allen Township, like numerous municipalities bordering the City of Bethlehem, receive their public water from the Bethlehem Authority and much like those other municipalities, we are too concerned that the Authority's watershed and its facilities remain in their current condition to continue to provide our residents with the water supply and quality they expect.

Please consider this letter as East Allen Township's request to take whatever steps are necessary to protect the Authority's watershed, reservoirs and transmission lines without interference from the impact of constructing the new natural gas pipeline.

Sincerely,

Deborah A. Seiple
Township Manager

CC: Honorable Patrick J. Toomey
Honorable Charles W. Dent
John Tallarico, Bethlehem Authority Chairman
