RE: Application of PennEast Pipeline Company, LLC for Certificates of Public Convenience and Necessity and Related Authorizations. FERC Docket No. CP15-558-000

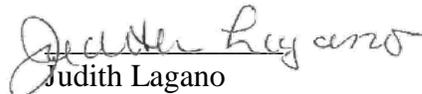

Dear Secretary Bose:

Pursuant to the Commission’s July 22, 2016 Notice of the draft environmental impact statement (“EIS”) for the proposed PennEast project (the “Project”), I write today on behalf of NRG REMA LLC (“NRG REMA”) to express our continued support for the approval and construction of the Project.

The EIS concludes that “construction and operation of the Project would result in some adverse environmental impacts, but impacts would be reduced to less-than-significant levels with the implementation of PennEast’s proposed and [the Commission’s] recommended mitigation measures.”¹ In light of the EIS’s findings, NRG REMA urges the Commission to promptly approve the Project.

As noted in NRG REMA’s October 22, 2015 Comments, the PennEast Pipeline will run in close proximity to the Gilbert Generating Station (“Gilbert”), a natural gas fired generating station owned by NRG REMA, which makes the proposed path of the Project an optimal location. Environmental impacts will be diminished if Gilbert can interconnect to the PennEast Pipeline, rather than constructing its own lateral. The PennEast Pipeline would enhance the fuel transportation service available to the Gilbert Generating Station. As such, NRG REMA offers its continued support of the PennEast Pipeline.

Sincerely,

Judith Lagano
President
NRG REMA LLC
